Purus Squatting Pan
Installation and operating instructions

Product information

WC squatting pan in 1.2mm EN 1.4301 satin finish stainless steel, recessed in the floor with two integrated rinse nozzles, for easy and hygienic rinsing. Non-slip foot area. Bowl shape suitable for male or female use. One-piece pressed seam-free WC bowl, for easy maintenance and better hygiene.

Installation

Please observe local rules and regulations, before installing this product.

1. Prepare the recess in the floor. Add min 50mm on each side and min 20mm to the depth.

2. Prepare water and water trap connections. Use flexible hoses to connect the spray nozzles.

3. Place and level the squatting pan even with the floor. If necessary, use spacers.

4. Add concrete to all area around the squatting pan up to the floor level

Maintenance

For cleaning, use a mild detergent (avoid chlorides or acids) and a soft cloth or brush. Scrub gently, not to scratch the surface. Rinse with cold water. Repeat cleaning if necessary. See document 'Purus Maintenance of Stainless Steel' for more information.
