The Purus Security Floor Gully comes with two different grates. The Stainless Grate is for high security needs and has anti ligature features built into it. The Round Plastic grate is for areas where a less institutional appearance is desired but with a secure locked grate.

The Security Floor drain comes with high strength Purus Clamping rings for vinyl and can be easily installed into vinyl flooring with the Purus NRF 3401103 Vinyl Knife.

The Purus Security outlets are made of Polypropylene (PP) plastic, which is designed to be self-cleaning and can remove up to 45 litres per minute. The drain has built in features for ease of maintenance and to avoid the build-up of dirt and bad odours are kept at bay thanks to the patented NOOD trap, which does not allow any bad smells to come up from the waste pipes even if the trap dries out.

The Purus Security Floor Gullies are available in four different outlets for horizontal and vertical installation into concrete subfloors going into various waste pipe sizes.

<b>Low Security Gully For Vinyl Floors 50mm Outlet</b>	Product Code
